

FIT Count field recording form

A Flower-Insect Timed Count can be carried out at any time of day between the beginning of April and the end of September, wherever a suitable target flower can be found, and when the weather is dry and warm:

- If sky is **clear** (less than half cloud) the minimum temperature for a count is **13°C**
- If sky is **cloudy** (half cloud or more) the minimum temperature for a count is **15°C**

1. About you

Your name: _____

- I am new to identifying wildlife
- I am familiar with identifying some wildlife (e.g. birds or butterflies) but not most pollinating insects
- I am familiar with recognising the main **groups** of pollinating insect
- I am confident in identifying the commonly-occurring pollinating insects **to species level**

2. Date and location of count

Date of count: _____

Location name: _____ (e.g. town/village, not full address)

Grid ref if known (or select from online map later): _____

Habitat (tick one box that is the best match):

- | | |
|--|---|
| <input type="checkbox"/> Garden | <input type="checkbox"/> Amenity grassland (usually mown short) |
| <input type="checkbox"/> School grounds | <input type="checkbox"/> Farm crops or grassy pastures |
| <input type="checkbox"/> Parkland with trees | <input type="checkbox"/> Upland bog/heath |
| <input type="checkbox"/> Churchyard | <input type="checkbox"/> Lowland bog/heath |
| <input type="checkbox"/> Grassy verge or hedgerow edge | <input type="checkbox"/> Waste ground |
| <input type="checkbox"/> Grassland with wild flowers (e.g. meadow) | <input type="checkbox"/> Woodland |
| <input type="checkbox"/> Other habitat type (please describe): _____ | |

3. Target flower (from the list on the left if possible)

Which target flower have you chosen? _____

- Target flowers cover less than half of 50x50cm patch
- Target flowers cover about half of patch
- Target flowers cover more than half of patch

Number of flowers in patch: _____

I counted:

individual flowers

flower heads

flower umbels

flower spikes

Please use one of the 'target flowers' if you possibly can:

- Dandelion
 - Buttercup
 - Hawthorn
 - Bramble/Blackberry
 - Lavender (English)
 - Common Knapweed
 - Heather (*Calluna* or *Erica*)
 - Hogweed
 - White Clover
 - Red Clover
 - Ragwort
 - Thistle (*Cirsium*)
 - Buddleja
 - Ivy
- (only choose another insect-attracting flower if none of the above are available)

Is your 50x50cm patch of target flowers:

- Growing in a larger patch of the same flower
- Growing in a larger patch of many different flowers
- More or less isolated

4. FIT Count

Once you are ready to start, check your timer so that you can record for exactly ten minutes. Please count **EVERY** insect that you see that **LANDS** on one of your target **FLOWERS** (if you're not sure what type it is just add it to the "Other insects" category). Please try to count each individual insect just once, and try not to lean over the flowers you are watching, as this can cast shadows and prevent insects approaching.

Time of count start: _____

Insect group	Tally of number seen:  = 7, etc.
Bumblebees	
Honeybees	
Solitary bees	
Wasps (including ichneumon wasps)	
Hoverflies (including 'non-typical' hoverflies)	
Other flies	
Butterflies and moths	
Beetles (larger than 3mm)	
Small insects (such as pollen beetles) less than 3mm long	
Other insects	

5. Weather conditions

Sky above your location:

- All or mostly blue
- Half blue and half cloud
- All or mostly cloud

During the 10-minute count, was your 50x50cm patch:

- Entirely in sunshine
- Partly in sun and partly shaded
- Entirely shaded

Wind strength (for all plants in area, not just target flowers):

- Leaves still/moving occasionally
- Leaves moving gently all the time
- Leaves moving strongly

Don't forget to **take a photo** of your target flower species and **add your counts** to the online form: <https://records.biodiversityireland.ie/record/fit-count> Please don't take photos during the count as this may disturb the visiting insects).

This survey follows the methodology of the UK Pollinator Monitoring Scheme. We thank them for their generosity in sharing resources.
