

Businesses helping pollinators

About:

We are passionate about sustainably harvested wild foods and locally produced fresh organic food. Our small team grows from seed or cutting on our farm by the sea in Connemara. We also encourage wild foods to grow by carefully tending to the unique ecosystem of our forested coastal land.

Actions already taken for pollinators:

- We maintain native flowering hedgerows and encourage wildflowers to grow around the farm.
- We do not use any artificial fertilisers and we do not use any pesticides.

“Joining the Pollinator Plan movement makes perfect sense for our business as it aligns well with our brand while pollinator friendly actions increase our revenue and make for a better future for Irish wildlife and a more sustainable future for the farm” - Denise Rocks, Little Green Growers

Future Plans:

We plan to protect flower-rich areas and manage non farmed areas to be as pollinator friendly as possible.
