

Lesson Plans

Note to teachers:

We have prepared 10 lesson plans. Some will be suitable for all age groups and these offer a variety of activities according to the age of your class.

Others will be most suited to the older classes as some contain complex ideas or require higher level mathematics or computer work.

Lesson plans 6-9 may also be useful to your Green Schools or Biodiversity Committee as they will help your school's submission for a Biodiversity Flag.

LESSON	Suggested suitability level
1. What is Pollination?	Junior Infants to 6th Class
2. Why is pollination important?	Junior Infants to 6th Class
3. Who are the Irish pollinators?	Junior Infants to 6th Class
4. What pollinators need: food, shelter, safety	3rd Class to 6th Class
5. Are pollinators in trouble?	3rd Class to 6th Class
6. Create a Map of your school yard	3rd Class to 6th Class
7. Score your school for bees	5th & 6th Class
8. Actions for pollinators	5th & 6th Class
9. Log your site and actions	5th & 6th Class
10. Surveying Insects	5th & 6th Class
