

No Mow May

Join the buzz to save the bees

Wild bees are in trouble and they need our help. There aren't enough flowers in our landscape to give them the pollen and nectar they need.

Lock away your lawnmower for **#NoMowMay** and give native wildflowers a chance to grow.

These flowers provide the best source of pollen and nectar for our hungry wild pollinators. By mowing less, we can give them a chance to appear naturally. No seeds needed!

Red Clover

Self-heal

Birds-foot trefoil

Dandelion

By taking part in No Mow May, you might spot these common species
